Thank You Canada Cycles for Kids 2024 for their support of the HGH's Children Rehabilitation Program!

HAWKESBURY, July 17, 2024 – The Hawkesbury and District General Hospital (HGH) Foundation is deeply grateful to the Canada Cycles for Kids cyclists for their incredible support in enhancing the wellbeing of children at our hospital! This year, these dedicated cyclists embarked on a journey from Hudson Qc to Montebello Qc, pausing midway at our hospital on July 13th, 2024. They were warmly received by the HGH Foundation staff and board of directors' president, as well as the team lead from the Children's Rehabilitation Program.

The Hawkesbury and District General Hospital (HGH) Foundation is thrilled to **announce the generous donation of \$30,000** received during the official cheque presentation. This funding will directly benefit the Children's Rehabilitation Program, enabling us to acquire much-needed new equipment.

This year marks the 23rd ride for these compassionate cyclists, who have collectively raised over \$2.9 million for pediatric healthcare initiatives nationwide. Canada Cycles for Kids transcends being just a cycling event; it embodies a celebration of community spirit and unwavering support for the youngest members of our society. Participants from across North America, including cyclists from Los Angeles, San Francisco, Toronto, Ottawa, Montreal and Boston joined forces to raise awareness and funds for our pediatric rehabilitation initiatives!

The HGH Foundation extends a heartfelt thank you to all the cyclists and their support team who participated in this year's ride. Special gratitude to the Canada Cycles for Kids organization that has graciously chosen the HGH Foundation as one of their beneficiaries. It is through the generosity and dedication of these donations that we can ensure the children in our community receive the highest standard of care and resources through our hospital's rehabilitation program.
